AQ-hyllan / AQ-shelf

Design Anne Qvist

Produktinformation

Hyllsystemet AQ-hyllan består av tre komponenter. Två synliga – lådan och hyllan och en osynlig – stiftet. Dessa tre komponenter skapar i samspel ett fint föremål med rum, utrymme och design. Dessutom ger de tre komponenterna användaren möjlighet att skapa sitt eget förvaringssystem som kan varieras och byggas upp igen och igen. De olika färgerna och materialen ger ytterligare en chans att skapa ett varierat uttryck – från den lilla lagringsenheten till den stora rumsavskiljaren.

Product information

The storage system AQ-shelf consists of three components. Two visible – the box and the shelf and one invisible – the pin. These three components creates a nice interplay of objects with place, space and design. Moreover, the three components give the user possibility to create their own storage system which can be varied and rebuilt again and again. The different colours and materials give another chance to create a vast array of expressions – from the small storage unit to the large room divider.

Teknisk information

AQ-boxar tillverkas i vit, ljusgrå eller svart standardlaminat, vit högtryckslaminat samt björk- eller ekfanér. Skivtjocklek 12 mm. Boxarna kan kompletteras med slagdörrar försedda med "push to open"-beslag. Hyllplan tillverkas i vit standardlaminat. Skivtjocklek 19 mm. Sittdynorna tillverkas i plywood och polyeter svept med flamfiber.

Technical information

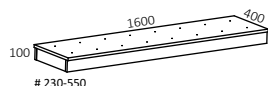

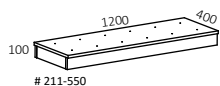

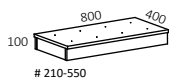

AQ-boxes are produced in white, light grey or black melamine, white high pressure laminate and birch or oak veneer. Board thickness 12 mm. The boxes can be completed with hinged doors fitted with "push to open". Shelves are made of white melamine. Board thickness 19 mm. The seat cushions are made of plywood and foam with flameproof fiber.
